“ It's now 2026 and Sherri is still my auntie no matter what me and her were also best friends and we're always hanging out and doing our makeup painting our nails and having sleepovers another thing we always like to do was have small little fashion shows with just me and her I remember when she came to live with us for a little bit and I would always stay in her room on an air mattress and we would hang out and talk all night and she would always listen she would never talk unless I asked her a question. She was like a therapist for me just to talk about boys and stuff that was going on in elementary school and I wish she was still here to talk to because now I realize that life is really hard and I know she would've listened to every word I had to saying love you auntie there will never be a day I don't think of you may you rest in peace I love you and miss you so much -Lexie bug ☐
