“ *My condolsnces to everyone. I will miss her phone calls and thoughtfulness. She had been a thread woven through my life since i was 9 or 10 years old. She always make me feel welcome and loved.*

*I miss you grandma. You are still the most amazing human being I've ever met. You did every job available. You helped build power plants, you helped children and adults. You became a social worker, a teacher, a special teacher. You became whatever you thought was the right thing. We should all be like you.*
